PROFESSIONAL SUMMARY

Fullstack Developer specializing in React, TypeScript, Node.js, and MongoDB. Experienced in engineering production-ready web applications that solve core business problems, from secure inventory management systems with real-time dashboards and role-based access control, to highly interactive client-facing websites. I have trained 135+ students in fullstack development and mentored 20+ junior developers, enabling me to write code with clarity and maintainability.

WORK EXPERIENCE

Turing Tech LLC - Fullstack Developer & Technical Instructor

Remote | March, 2024 - Present

- Trained 135+ students in fullstack development (HTML, CSS, JavaScript, React, Node.js, Express), achieving 85% course completion rate.
- Mentored 20+ junior developers through code reviews, debugging sessions, and system design discussions.
- Redesigned curriculum structure using real-world project-based learning, improving student outcomes and course clarity by 40%.
- Collaborated with team to develop training materials, assessments, and hands-on coding exercises.
- Delivered technical workshops on authentication patterns, API design, and database optimization

Freelance Fullstack Developer

Remote | January 2023 - Present

- Delivered custom web applications for clients across retail, hospitality, and cleaning services sectors in Nigeria, Canada, and the United States.
- Built **MekRecords** - a complete inventory and sales management system for a Lagos-based retail business, replacing manual paper processes and handling 10,000+ sales records with optimized MongoDB indexing.
- Built and deployed **The Sillage Lab** - a production website for an Arizona-based luxury perfume bar, using Next.js, TypeScript, Tailwind CSS, and Framer Motion, with Web3Forms integration for client inquiry management.
- Built and deployed **IdemStudios** - a luxury photography studio website for a Tempe, Arizona creative space, using Next.js, TypeScript, Tailwind CSS, Framer Motion, and Acuity Scheduling for direct studio bookings.
- Designed authentication architecture using JWT, Bcrypt, refresh tokens, and RBAC for secure, scalable applications.
- Developed REST APIs serving React applications, handling user management, payments, and analytics.
- Managed full project lifecycle from requirements gathering to deployment, maintaining ongoing client relationships.

PROJECTS

MekRecords - Inventory & Sales Management System *(Client Project - Private)*

Technologies: React, TypeScript, Node.js, Express, MongoDB, JWT, Tailwind CSS

- Delivered complete inventory system replacing manual paper-based processes for Lagos retail business, handling 10,000+ sales records with optimized MongoDB indexing.
- Implemented JWT authentication with refresh token rotation and role-based access control (RBAC) restricting admin operations including batch management, user control, and financial reports.
- Built multi-item transaction system with thermal receipt generation (PDF), batch tracking, profit calculation, and advanced filtering by date range, payment method, and status.
- Designed responsive UI with dark mode support and CSV/PDF export functionality, serving desktop, tablet and mobile users.

The Sillage Lab - Luxury Brand Website *(Client Project)* / [Live Site](#)

Technologies: Next.js, TypeScript, Tailwind CSS, Framer Motion, Web3Forms, Vercel

- Built and deployed a production website for Arizona's first luxury mobile perfume bar, serving clients across weddings, private parties, and curated events.
- Implemented smooth animations and scroll interactions using Framer Motion to match the brand's luxury aesthetic.
- Integrated Web3Forms for client inquiry management and deployed on Vercel with custom domain and SSL.

IdemStudios - Luxury Photography Website *(Client Project)* / [Live Site](#)

Technologies: Next.js, TypeScript, Tailwind CSS, Framer Motion, Web3Forms, Acuity, Vercel

- Engineered a scroll-jacking horizontal swipe section with spring animations using Framer Motion, delivering a cinematic browsing experience tailored to the brand's luxury aesthetic.
- Integrated Acuity Scheduling for direct studio bookings and Web3Forms for client inquiries, with an animated success modal on form submission.
- Implemented SEO optimization including metadata, Open Graph tags, and sitemap submission, alongside Google Analytics for visitor tracking and conversion insights.

EDUCATION

- B.ENG Polymer & Textile Engineering.
Nnamdi Azikiwe University, 2014

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript, TypeScript, React, Next.js, Node.js, Express, HTML5, CSS3
- **Frontend:** React Router, React Hook Form, Zustand, Tailwind CSS, Framer Motion, Responsive Design, Component Architecture
- **Backend & APIs:** RESTful API Design, JWT Authentication, RBAC, Bcrypt, Request Validation, Error Handling
- **Databases:** MongoDB, PostgreSQL
- **DevOps & Tools:** Git/GitHub, Vercel, Render, Railway, Postman, Chrome DevTools
- **Integrations:** Paystack, Web3Forms, EmailJS, Formspree
- **Soft Skills:** Technical Instruction, Code Review, Remote Collaboration, Client Communication
